Abbreviations: px = pixel sec = seconds fps = frames per second

General Ad Requirements (Apply to all ads):

- **Interest-Based Advertising (IBA):** Include IBA self-regulation controls for ads using behavioral targeting (5 KB max file size)
- **Audio:** Must be user-initiated. To allow for audio initiation in videos without player controls, a control may be included for user to initiate audio.
- **Hotspot:** Not to exceed 1/4 size of ad. Initiated when cursor rests on hotspot for atleast 1 sec. Must NOT initiate audio.
- **Defining ad space:** Ad unit content must be clearly distinguishable from normal webpage content (ad unit must have clearly defined borders and not be confused with normal page content).
- **Max CPU:** Ad not to exceed 30% CPU usage during host-initiated execution.
- **Submission lead time:** Minimum lead time for ad file submission is 6 days before campaign start.
- **Max number of host-initiated file requests:** Ad not to exceed 15 file requests during initial file load and host-initiated subload. Unlimited file requests allowed after user-interaction.

General Notes:

- 1. File weight calculation:** All files for the ad (.html, .js, .css, images, etc.) must be included as part of the maximum file weight calculation for all file load limits. Shared libraries are also included as part of the file weight calculation unless otherwise exempted. File weights are calculated after files have been compressed into gzip format.
- 2. Initial file load:** Includes all assets and files necessary for completing first visual display of the Ad.
- 3. Host-initiated subload:** Where allowed, additional files may load one second after the browser domContentLoadedEventEnd event. The ad should be able to “listen” for the browser domContentLoadedEventEnd event before subsequent files beyond the initial max file size may be loaded.
- 4. User-initiated file size:** Ads that allow additional file size for host-initiated subload also allow for unlimited file load after user-initiated interaction. User initiation is the willful act of a user to engage with an ad. Users may interact by clicking or tapping the ad, and/or rolling over an ad (or a portion of an ad).

HTML5 Note:

HTML5 provides / introduces new options for developing ads. The IAB has developed “HTML5 for Digital Advertising” (<http://www.iab.com/html5>) to help ad designers provide ads in HTML5 unit that will perform more successfully across the display advertising ecosystem. Please review this document and adopt its recommendations to help improve HTML5 ad performance in the industry.

Online Opportunities

TOPIC RESOURCE CENTER & QUIZZES

Exclusive opportunity for dedicated, comprehensive topic resource center or quiz on the topic of your choice. Includes traffic driving elements.

Starting at \$7,500/month (net), 3-month minimum buy
